

BigPack

Ecopalet Cardboard

**BigBags storage
recyclable solution**

**Agility, lightness and
transportation security
with forklift**

Store your Big Bags with cardboard

Avoid bag breaks

This model of pallet does not have nails or splinters, so the possibility of the bags breaking and merchandise being lost is reduced.

Less weight

Compared to a wooden pallet, which weighs between 10 and 25 kilos, the BigPack EcoPalet Cardboard weighs between 1 and 5 kilos.

Greater agility in transportation

Compared to a wooden pallet, which weighs between 10 and 25 kilos, the BigPack EcoPalet Cardboard weighs between 1 and 5 kilos.

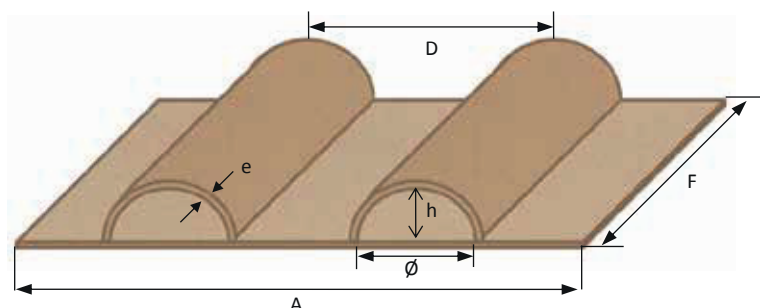

Stacked in three heights.

This pallet system allows 100% safe stacking of BigPacks in the warehouse up to 3 heights.

BigPack Ecopalet Carboard

Technical Data

D = Blade input distance
A = Width
F = Depth
e = Thickness
ø = Channel diameter
h = Channel height

A (mm)	F (mm)	D (mm)	ø (mm)	h (mm)	e (mm)	Max weight stacked (kg)	Recommended maximum stack	Transport stacked
1.100 mm	1.100 mm	450 mm	150 mm	75 mm	8 mm	4.000 kg	3 levels	2 levels

Usage recommendations

Do not use on open rack shelves or on rollers.
Do not exceed the maximum recommended weights.

⚠ ATTENTION

The feasibility of stacking in 2 or 3 heights depends on the type of Bigbag, merchandise and environment where it is used.

The customer must carry out his own approval of the product to confirm the validity of the system.
