COLLAPSIBLE CONTAINER
REUSABLE AND REMOUNTABLE

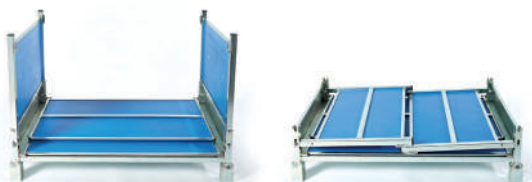

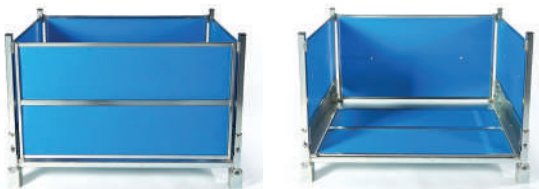

- Reusable Container
- Reduce waste (cardboard, plastic,...)
- Cost savings
- Foldable (ratio 3:1)

Mainly used in production lines for the storage of light products such as plastic caps, cork stoppers, small containers etc... They can also be used in food products since they have the possibility of incorporating a bag of polyethylene or polypropylene.

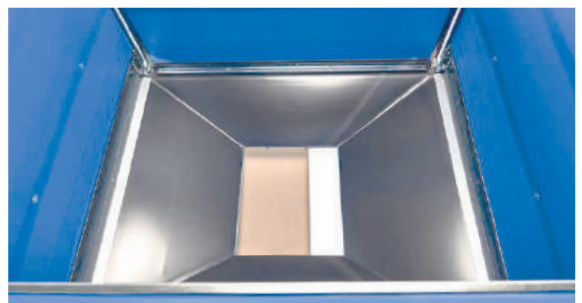

The containers are stackable at a height of 15 units (folded) and 3 units (open).
All container components are removable and replaceable.
